

# HOW TO DRAW

1

Draw two circles for eyes and one rounded rectangle for the nose....

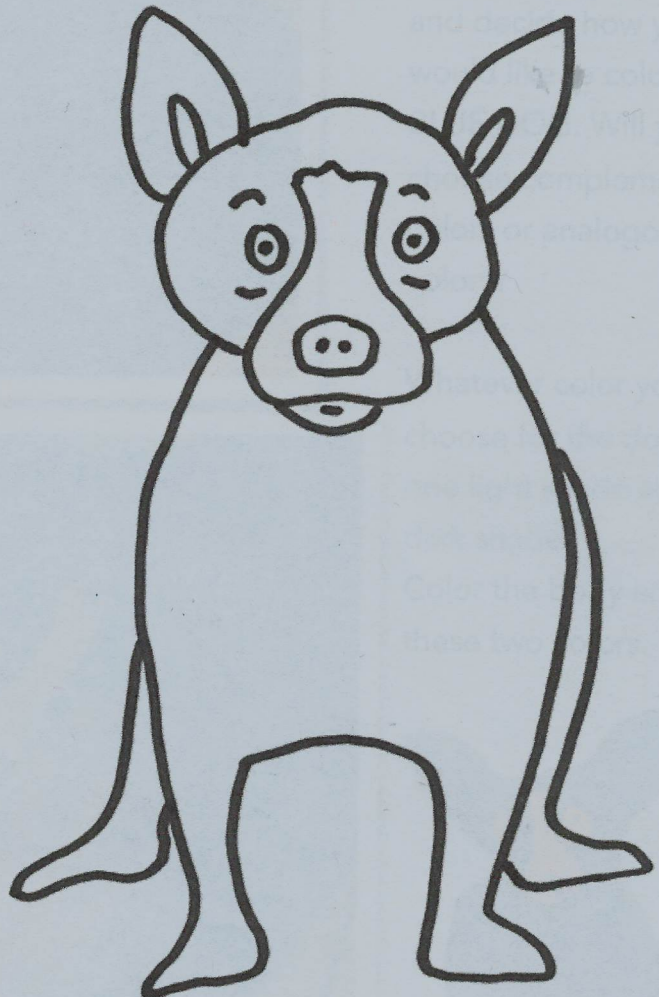

2

Starting above the eye, draw a line inside the eye, around the bottom of the nose and up to the other eye.

3

Add two BIG ears, a shape inside the ears and a mouth area.

4

Place oil pastel on one side of the face and draw a curved line towards the bottom of the paper. Do the same for the other side. Draw feet and connect the two.

5

Add the funny looking back legs, but leave the dots in the nose (nostrils!) and the pupils for later.
